Health Statistics for 2014 U.S. Adults: National Health

In the field of psychology, nativism is the view that certain skills or abilities are "native" or hard-wired into the brain at birth. This is in contrast to empiricism, the "blank slate" or tabula rasa view, which states that the brain has inborn capabilities for learning from the environment but does not contain content such as innate beliefs. This factor contributes to the ongoing nature ...

The Psychological Effects of Media Violence on Children and Adolescents Joanne Cantor, Ph.D. Research on media violence is often misunderstood by the general public.

media violence paper - So You Think You Can Multitask?

Psychological behaviorism is a form of behaviorism — a major theory within psychology which holds that generally human behaviors are learned — proposed by Arthur W. Staats. The theory is constructed to advance from basic animal learning principles to deal with all types of human behavior, including personality, culture, and human evolution.
