Numerical analysis is the study of algorithms that use numerical approximation (as opposed to general symbolic manipulations) for the problems of mathematical analysis (as distinguished from discrete mathematics). Numerical analysis naturally finds application in all fields of engineering and the physical sciences, but in the 21st century also the life sciences, social sciences, medicine ...

Numerics Working Group The goals of the Numerics Working Group of the Java Grande Forum are (1) to assess the suitability of Java for numerical computation, (2) to work towards community consensus on actions which can be taken to overcome deficiencies of the language and its run-time environment, and (3) to encourage the development of APIs for core mathematical operations.
