IOM releases progress report on Future of Nursing 2020 goals

Nursing is a profession within the health care sector focused on the care of individuals, families, and communities so they may attain, maintain, or recover optimal health and quality of life. Nurses may be differentiated from other health care providers by their approach to patient care, training, and scope of practice. Nurses practice in many specialties with differing levels of prescription ...

The Critical Incident Technique (or CIT) is a set of procedures used for collecting direct observations of human behavior that have critical significance and meet methodically defined criteria. These observations are then kept track of as incidents, which

are then used to solve practical problems and develop broad psychological principles. A critical incident can be described as one that makes ...

Critical Incident Technique - Wikipedia

Gloria was an unemployed new grad in 2012. This is her story from early 2013 where she said that finding employment is the biggest hurdle for nursing's new graduates. Like many young people coming to the end of high school, I had no idea what I wanted to do with my life, or rather, I had too many ideas and aspirations and couldn't settle on just one.
