Nurturing the preterm infant brain: leveraging

Nurturing Brain Development in Preterm Infants. The lungs, the heart, the digestive system, the eyes, the ears—and the brain—may not have reached their full potential when a preemie comes into the world. Lacking proper brain development, premature infants are at elevated risk for problems with learning, communication, emotional regulation,...

Erin Sundseth Ross, PhD., CCC-SLP (presented by Debra Paul

They pose a risk of premature birth, although there are cases of post term of twins. The birth of a premature baby can occur in 75% of women who become mothers for the ? rst time and in 45% of those women who had given birth before. This is due to the fact that, as it is stretched more than usual, the uterus contracts more easily.

ALL ABOUT BABIES PREMATURE - earlybaby.info

your new baby! You may be surprised that your baby delivered before your due date but the doctors, nurses and staff at UCSD will help your family get off to a great start. Your baby is a late preterm infant because she was born 3–6 weeks early, at 34 to 37 weeks gestation. She may look like a full term baby but she is premature

The Late Preterm Infant: A Little Baby with Big Needs

Prematurity refers to babies born before 37 weeks of gestation, a time when each day and each week are important for the baby's growth and development. When that happens, the new dad, mom and baby are met with a host of unknowns.

Preemies: Loving and Nurturing the Tiniest Tots | ParentMap

Traditionally, non-medical, developmental intervention with premature infants has been a controversial topic in neonatal intensive care units (NICU). However, a small but growing band of researchers have been pushing for the acceptance of alternative interventions, such as kangaroo care and massage therapy, that do not resort to surgical or other medical practices.
