Ocean Science Journal (OSJ) is an international journal whose aim is to achieve the advancement and dissemination of information in the field of oceanography.. The journal is committed to the publication of original research articles, reviews and notes on all fields of oceanography including physical oceanography, biological oceanography/marine biology, chemical oceanography/marine chemistry ...

Ocean Science Journal - springer.com

Argo is an international program that uses profiling floats to observe temperature, salinity, currents, and, recently, bio-optical properties in the Earth's oceans; it has been operational since the early 2000s. The real-time data it provides is used in climate and oceanographic research. A special research interest is to quantify the ocean heat content (OHC).

Argo (oceanography) - Wikipedia

Applications are invited from scientists with interests in oceans and human health, cancer and aging research using marine organisms, and marine molecular biology to complement research and education activities at Bermuda Institute of Ocean Sciences (BIOS).

The MSc Oceanography degree is designed primarily for students with no previous specialisation in marine science. So if you are a graduate with a degree in biological sciences, chemistry or materials science, physics, maths, environmental science, physical geography or related disciplines, and you have an interest in marine science or oceanography, this could be the course for you.

About - The Dunn Lab is in the Department of Ecology and Evolutionary Biology at Yale University.. We study how evolution has produced a diversity of life. We are interested in learning about the actual history of life on Earth as well as the general properties of evolution that have contributed to these historical patterns.
