Is migration good for the economy? - OECD.org - OECD

This study focuses on the risk of automation and its interaction with training and the use of skills at work. Building on the expert assessment carried out by Carl Frey and Michael Osborne in 2013, the paper estimates the risk of automation for individual jobs based on the Survey of Adult Skills (PIAAC).

A carbon tax is a form of pollution tax (although carbon dioxide is naturally occurring). Pollution taxes are often grouped with two other economic policy instruments: tradable pollution permits/credits and subsidies.

Carbon tax - Wikipedia

Base erosion and profit shifting (BEPS) refers to corporate tax planning strategies used by multinationals to "shift" profits from higher-tax jurisdictions to lower-tax jurisdictions, thus "eroding" the "tax-base" of the higher-tax jurisdictions.. The Organisation for Economic Co-operation and Development (OECD) define BEPS strategies as also: "exploiting gaps and mismatches in tax ...

This study explores how in 2016 Fortune 500 companies used tax haven subsidiaries to avoid paying taxes on much of their income. It reveals that tax haven use is now standard practice among the Fortune 500 and that a handful of the country's biggest corporations benefit the most from offshore tax avoidance schemes.

The performance of the Eurozone economy is inextricably linked to the health of its banking system. That means the economy will likely stagnate unless European banks can build robust balance sheets, earn a competitive return on equity, and generate adequate capital to support faster growth and innovation.

Climate. Jobs. Justice. A Green New Deal is more than just renewable energy or job programs. It is a transition to the 21st century economy.

A Green New Deal — Data For Progress

Oil is the dominant fuel source for transportation (Fig. 1a) with road transport accounting for 81% of total energy use by the transport sector (Fig. 1b). This dependence on fossil fuels makes transport a major contributor of greenhouse gases and is one of the few industrial sectors where emissions are still growing (WBCSD, 2001). The impact of transport on the global climate is not limited to ...
